

***Fife and Tayside Wider Access Forum  
Transitions***

***Pre-access in Communities Project Consultations Summary  
June-July 2006***

The transitions development officer has met with the members of the pre-access steering group available in the period outlined and discussions have resulted in the following recommendations:

1. That planning for pre-access activities should be deferred further to a local level, although approval for funding would still be required from the steering group
2. That programmes of activities will be submitted rather than single bids, and a new pro-forma will be created to enable this process
3. That the type of pre-access activities funded should be widened to incorporate additional support for participants and meet local needs
4. That invoices will still be sent to the development officer for each individual course/activity in order to maintain the same degree of accountability
5. And that provision should be stepped up to maximise the best use of resources
